

QUICK-GLIDE

INVISIFOLD DOOR

Aluminium Slide & Stack Doors

Individual Slide & Stack Panels

One of the key benefits of the Quick-Glide door is its flexibility. Open a single panel and slide the rest across to create a versatile opening.

Unlike the traditional bifold that opens in a singular, concertina fashion, the panels of the Quick-Glide door can be moved one by one. Not only do the door panels slide independently, but they can also be opened independently for easy access outside.

Practical Details

- 28mm Double Glazed Toughened Glass Unit with Argon Gas Insert as Standard
- Opening Outwards, Left or Right
- PAS24: 2016 Upgrade Available
- Rebate with Brushpile & Flipper Gasket
- Cycle & Weather Tested to British Standards

Aesthetic Appeal

With no visible hinges or hardware when closed – other than a simple handle on the main door – Quick-Glide is as sleek and stylish as it is flexible. When closed, the slim profile, square sashes and minimal hardware gives a great finish, flooding a room with natural light and making it feel spacious and bright.
